

Investment Approach

Silverhawk's investment approach is to support talented management teams with growth capital during periods of business strength and weakness, and to work as hard as possible to make each investment successful for management and Silverhawk's investors. In each investment, Silverhawk strives to assist its management teams by leveraging off past experiences with former portfolio companies, and industry contacts, as well as provide advice on acquisitions, divestitures and shareholder value creation. Silverhawk's Operating Partner, Mark Demetree, provides a valuable contribution through his experience as a manager and leader of a number of industrial businesses.

Upon realization of each investment, our goal is for every portfolio management team to remember Silverhawk as a partner that was consistently supportive, extremely hard-working and more than fair in all aspects of the manager/investor relationship.
